Feedback and participation: synthetic review fixture

This is a public software test manuscript. It reports no real study or participant data.

The abstract reports 52 students. The methods and Table 1 report 48 students.

Methods and findings

Feedback supports learning in important ways. The intended meaning of participation is not specified here.

The study included 48 students. We have not supplied a record of when the analysis plan was fixed.

Group	n
A	24
B	24
Total	48

Table 1. Synthetic participant counts. Total: 48.

The table provides counts only; the basis for selecting the groups needs verification.

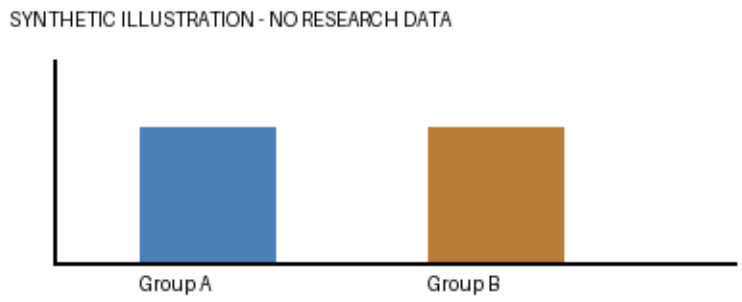

Figure 1. Synthetic illustration; no measured effect is depicted.
